

JESÚS ZAMUDIO NOGUERA

SOFTWARE ENGINEER | ORACLE · POSTGRESQL · ANGULAR · .NET

+34 711 798 907 | jesuszamudionoguera@gmail.com | Sevilla, España

PROFESSIONAL PROFILE

Software Engineer with over 4 years of experience in the development, evolution, and support of enterprise applications for the energy sector. Comprehensive involvement in the software development lifecycle: requirements analysis, technical design, development, testing, deployment, support, and continuous improvement. Specialization in Oracle PL/SQL, PostgreSQL PL/pgSQL, Angular, TypeScript, Ionic, and .NET components, with experience in SQL optimization, integrations, Angular migrations, team coordination, and direct client communication. Application of automation and AI to enhance operational efficiency.

PROFESSIONAL EXPERIENCE

Software Engineer | NTT DATA Europe & LATAM | Marzo 2022 - Present

- End-to-end development and evolution of strategic applications for the energy sector, covering everything from requirements gathering and technical design to testing, deployment, support, and continuous improvement.
- Backend design, development, and maintenance using Oracle PL/SQL and PostgreSQL PL/pgSQL, including queries, stored procedures, database processes, and administration tasks.
- Optimization of SQL statements and database processes to enhance application performance, stability, and maintainability.
- Frontend and mobile/web development using Angular, TypeScript, HTML, CSS, and Ionic, alongside integrations and middleware via .NET components and REST APIs.
- Functional and technical analysis of new developments, system enhancements, and incidents, with tracking and documentation in Jira, Confluence, and ServiceNow.
- Management of versions, branches, and deployments using Git, Bitbucket, and Bamboo, collaborating on Angular migrations and ensuring the functional continuity of critical applications.
- Coordination and supervision of development team tasks, direct client communication, and monitoring of quality, priorities, deadlines, and deliverables.
- Design and implementation of automation, intelligent agents, and applied AI solutions to reduce manual tasks and improve operational efficiency.

FEATURED PROJECTS – ENERGY SECTOR

SIGMEL | Oracle PL/SQL, SQL, .NET, Angular, TypeScript: integration, processing, management, and validation of measurement data; evolutionary development, SQL optimization, technical support, and Angular migration.

Interfaz SIE | PostgreSQL PL/pgSQL, SQL, .NET: integration and information exchange between corporate systems; backend development, support, and functional and technical issue resolution.

EMAPP | PostgreSQL PL/pgSQL, Ionic, .NET: management and optimization of business processes; mobile/web maintenance, backend processes, and middleware.

IBOST | Oracle PL/SQL, SQL, .NET, Angular, TypeScript: Energy sector settlement platform; collaboration on frontend migration, technical compatibility, and functional continuity.

PERSONAL PROJECTS

pg_metadata - PostgreSQL, SQL, PL/pgSQL: A PostgreSQL extension for extracting DDL from database objects, providing functionality equivalent to the Oracle DBMS_METADATA package and allowing DDL retrieval via SQL queries or PL/pgSQL code. [GitHub](#)

PadelAcademy - React Native, Expo Router, Supabase, PostgreSQL: Mobile application for managing students and instructors at a padel academy, developed using React Native and Expo Router, with Supabase and PostgreSQL for data persistence and backend services.

OCI Autonomous Database + ORDS - Oracle Cloud Infrastructure, Oracle Autonomous Database, ORDS, SQL/PLSQL: A personal environment on OCI featuring an Oracle Autonomous Database (Transaction Processing workload) with ORDS enabled, used for developing and testing projects involving dynamic architectures and the exposure of database-based services.

SKILLS

Analysis and management: functional and technical analysis, requirements gathering, incident management, team coordination, client communication

Technologies: Oracle PL/SQL, Oracle Forms, Oracle ORDS, Oracle APEX, Oracle Cloud (OCI), PostgreSQL PL/pgSQL, SQL, Angular, TypeScript, HTML5, CSS3, Ionic, C#/.NET, REST APIs.

DevOps y tools: Git, Bitbucket, Bamboo, Jira, Confluence, ServiceNow, Postman, Bruno, SQL*Plus, SQLLoader, DBeaver, Visual Studio Code.

Systems: Linux/Unix, Windows Server.

IA y automation: AI applied to development, intelligent agents, and the automation of processes and operational tasks.

Additional skills: Java, React, Docker, Kubernetes.

EDUCATION AND LANGUAGES

Higher Technician in Multiplatform Application Development | Santa Joaquina de Vedruna | 2019 - 2021

Languages: Native Spanish | Intermediate English
